

The WOMEN'S HEALTH PROTECTION ACT

(WHPA) works toward a future where all of us are free to make the personal decisions that shape our lives, our futures, and our families, without political interference.

When passed, WHPA will re-establish a nationwide right to abortion in the United States.

➤ WHPA Protects Abortion Access After *Roe*

Equal access to abortion care—everywhere—is essential for social and economic equality, reproductive autonomy, and the right to make our own decisions with dignity and self-determination.

But the U.S. Supreme Court has taken away the constitutional right to abortion and states are rushing to ban abortion, leaving millions without access to care. Twenty-five states are expected to ban abortion in the wake of this decision.

WHPA would protect abortion access across the country, despite the Supreme Court's decision overturning *Roe v. Wade*.

➤ Working Toward Reproductive, Economic, and Racial Justice

People hurt most by abortion restrictions are those who already face discriminatory barriers to accessing health care—particularly Black, Indigenous, Latina/x, Asian American and Pacific Islander, and other People of Color, women, and those working to make ends meet. Ensuring access to abortion care is central to the pursuit of Reproductive Justice and the human rights to maintain bodily autonomy and live in safe and sustainable communities.

➤ Congress Can and Must Protect Abortion Access

Every day without congressional action means more people are being denied their human right to abortion. We need a federal legislative solution. **WHPA is that solution.**

The U.S. Congress can and must act immediately to re-establish the right to access abortion across the country.

**Equal Access
to Abortion,
Everywhere.**

WHPA:

Federal legislation creating a statutory right for health care providers to provide abortion care, and a right for their patients to receive that care, free from bans and restrictions that single out abortion and impede access.

1 in 4

Nearly one quarter of women in the U.S. will have an abortion in their lifetime.

13

Number of states that have banned abortion outright since *Roe* was overturned. Eight more states are likely to follow suit.
